

A38 Derby junctions scheme

Public consultation
7 September to 18 October 2018

The A38 is an important route from Birmingham to Derby and through to the M1 at junction 28.

Where the road passes through Derby, long distance traffic interacts with a large volume of vehicles making local journeys. This causes congestion and delays at the following three existing roundabout junctions:

- A38/A5111 Kingsway roundabout
- A38/A52 Markeaton roundabout
- A38/A61 Little Eaton roundabout

We're consulting on plans to replace these junctions and have produced a consultation brochure and questionnaire to help you understand more about what we are proposing, and allow you to have your say on elements like pedestrian and cyclist access and environmental mitigation measures.

Please pick up a copy of the brochure and response form or visit our webpage, www.highwaysengland.co.uk/A38-Derby-Junctions, for more information or to take part online.
