These indicative layouts are provided for the purposes of consultation, to provide an indication of the activities and types of equipment that would be contained within the compounds, and one potential option for the layout of these. The detailed layouts will be determined by the construction contractor, however the DCO Application will set out any requirements to minimise environmental effects, such as constraints on the maximum height of stockpiles and the positioning of noise-generating equipment.
These indicative layouts are provided for the purposes of consultation, to provide an indication of the activities and types of equipment that would be contained within the compounds, and one potential option for the layout of these. The detailed layouts will be determined by the construction contractor, however the DCO Application will set out any requirements to minimise environmental effects, such as constraints on the maximum height of stockpiles and the positioning of noise-generating equipment.
These layouts are provided for the purposes of consultation, to provide indicative diversion locations at this stage. These may be subject to change through further design development and will have regard to the responses to the consultation. The DCO Application will set out any requirements to minimise environmental effects.
GENERAL

- Proposed Development Boundary
- Proposed National Grid Overhead Line Diversion

EXISTING/BASELINE

Environmental Features
- Water Features, Ponds, Rivers & Watercourses
- Woodland
- Hedgerows

Primary Planning and Policy Considerations
- Area of Outstanding Natural Beauty (AONB)
- Site of Special Scientific Interest (SSSI)
- Sites of Special Protection Areas (SPA)
- Ramsar Sites
- Ancient Woodland
- Open Access Land
- Conservation Area
- Listed Buildings

PROPOSED ELEMENTS

General Environmental
- Potential receptor site for excavated material/landscape enhancement
- Potential receptor site for ancient woodland compensation
- Replacement land allocated for Open Access Land
- Replacement land allocated for Community Open Space

Environmental Elements
- Water
  - Proposed Flood Compensation Area
  - Indicative Watercourse Diversions
- Nature Conservation and Biodiversity
  - Potential receptor site for translocation of protected species/Ecological Improvement works
- Landscape Elements
  - Grassland (*1)
  - Planting (*2)
  - Hedgerows (*3)
- Trees
  - Individual Trees
- Wetland Habitats
  - Water Bodies and Associated Plants
- Hard Landscape Features
  - Green Wall
  - Green Bridge/Structure
